

At Ace, We Speak The Language of Lighting

Watts or Lumens? CFLs or LEDs? At Ace, we know light bulbs are undergoing some pretty historic changes recently and we understand it can be a bit confusing. We understand you need help navigating all the new terminology, which is why, when you come to Ace, we won't make you waste your afternoon standing in an aisle to figure it out for yourself. We'll help you find the right light bulb quickly and easily by asking you all the right questions. Because at Ace, we understand you'd much rather spend the weekend reading a good book as opposed to a bunch of light bulb packages. That's why it's better at Ace, where we speak the language of lighting.
